All,

Thanks for you patience as we move forward to schedule the meetings with EPA staff, state staff and the contractor. Before we completely finalize the technical direction for each state we'd like to have a call with all needed staff and the contractor. Katharine and I met with the contractor last week and reviewed the TD you all submitted by June 7, and a few more points came up that we can discuss on a call. Tetra Tech has identified the appropriate staff to support the variety of projects, and here is the availability for the first calls for those states we still need to schedule the first meeting:

State and Regional Availability.docx

Please let me and Katharine know at least two times from those that are clear that you and the appropriate state staff are available - fill this in for the approp states and send it back (the more times, the merrier). If none of these times work, please propose times during the week of July 9 or the week of July 23 and we'll work something out. Once we get your availability, we'll send out a meeting invitation, so please let us know if there are others at the state (than on the TD) that should be included in the invite.

Thanks,
Katie
